Company Announcements Office ASX Limited

## QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDED 30 JUNE 2023

During the quarter, Santa Fe Minerals Ltd (**"Santa Fe", "SFM"** or **"the Company"**) continued exploration at its Mt Murray base metals project and Watson's Well Vanadium project.

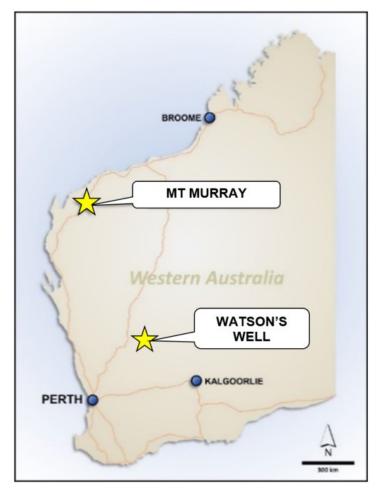

Figure 1: Project locations.

## Mt Murray Base Metal Project (SFM earning 80%)

SFM is exploring the Mt Murray Project for both nickel-copper-palladium-platinum mineralization and base metal copper-lead-zinc-silver-gold mineralization where previous SFM UFF geochemistry has defined 3 high priority target areas for immediate follow up exploration.

The Company has secured a contractor to conduct a Moving Loop Electro Magnetic (MLEM) survey over all 3 targets. The program is expected to commence in the coming days and will take approximately 2 weeks to complete.

## El Paso Target

The El Paso target is a large 5km long magnetic high area interpreted as a mafic-ultramafic intrusive complex prospective for Ni-Cu-PGE mineralization. The target is mostly concealed by sand cover with only a small outcrop of silicified ultramafic.

Previously completed Ultra Fine Fraction (UFF) soil sampling defined an 800m long zone of strong coincident Ni-Cu-Cr-Mg central to the interpreted intrusive. The highest results were 490ppm Ni, 73ppm Cu, 558ppm Cr and 11,100ppm Mg.

There is a second 800m long zone of strong coincident Ni-Cu-Cr-Mg located 2km to the north, within the Highway group of targets. This zone (El Centro) is associated with a concealed northeast striking narrow magnetic high unit. Based on similar geochemistry this is likely to also be a mafic to ultramafic intrusive with potential for magmatic nickel mineralization.

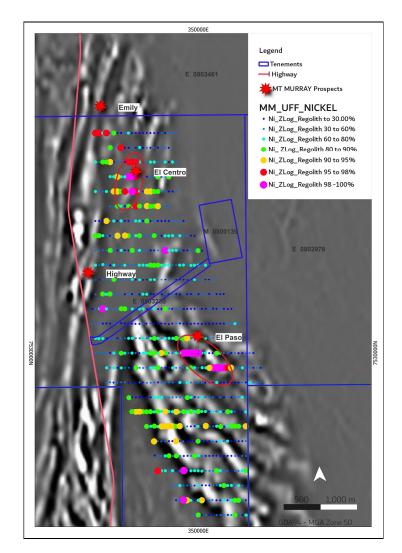

Figure 2: El Paso and El Centro UFF sample results Ni standard deviation percentile leveled by laboratory job and regolith type.

## **Highway Targets**

The Highway targets are located adjacent to the North-West Coastal Highway in the north part of the Mt Murray Project area. Rock chip sampling and mapping has defined a chert and quartz vein zone over about 300m strike with high-grade Pb and Ag (SFM ASX 5<sup>th</sup> April 2022). To the north and south the mineralization was thought to be concealed beneath sand cover.

The UFF soil sampling successfully confirmed the outcropping mineralization may extend under cover north and south of the known high-grade zone. Soil results show a strong Pb-Zn-Ag-Au +/- Cu association over at least 2.5km striking north-north-east. The highest results are 2,440 ppm Pb, 730ppm Zn, 102ppm Cu and 55.1ppb Au. The anomalous zone is open to the north and south.

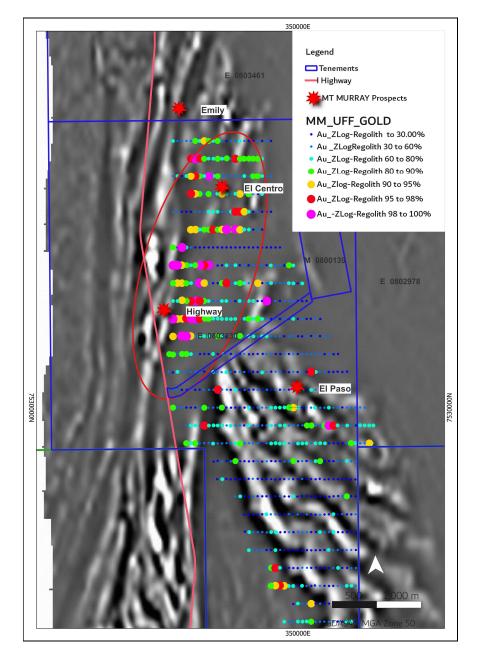

Figure 3: Highway Prospect UFF sample results - Au standard deviation percentile leveled by laboratory job and regolith type.

## **Ridgeback Targets**

The Ridgeback prospect is located at the southern end of the Mt Murray project and was previously highlighted as an area of anomalous Cu-Pb-Zn-As-Au stream sediment samples and a strong late time airborne electromagnetic anomaly (SFM ASX 12<sup>th</sup> Jan 2022). SFM rock chip sampling returned results up to 59ppb Au, 450ppb Ag, 3080 ppm As, and 629 ppm Cu from multiple outcropping quartz iron veins (SFM ASX 5<sup>th</sup> April 2022). The strong surface iron enrichment and the airborne EM anomaly may result from a sulphide deposit at depth. There has not been any previous soil sampling over this area and the UFF soil sampling completed will help define the extent of follow up exploration.

The UFF soil sampling over the Ridgeback target area has successfully defined a strong multi element Cu-Zn-Ni-Au-Ag anomaly which extends north to the historic Kin prospects. The total strike extent of the Ridgeback and Kin anomaly's is over 2km. The highest results are 182ppm Cu, 154ppm Pb, 202ppm Zn, 1300ppm As and 69.7ppb Au.

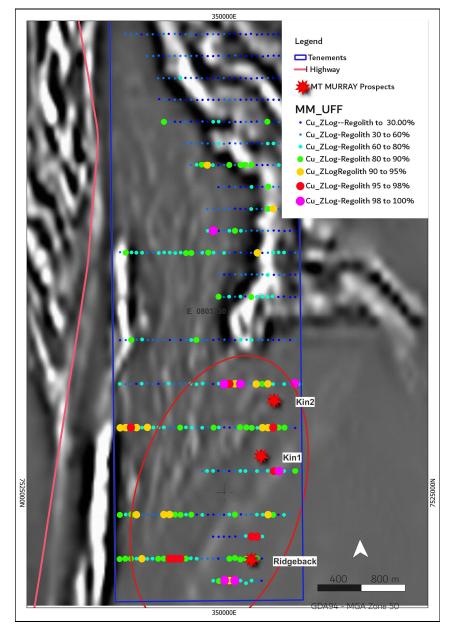

Figure 4: Ridgeback UFF sample results – Cu standard deviation percentile leveled by laboratory job and regolith type.

## Other UFF Soil Anomaly's

A total of 19 UFF soil anomalies were previously defined over 9kms strike. 11 of the anomalies are contained in 3 main target area, Highway, El Paso and Ridgeback. The remaining 8 soil anomalies will be further examined with respect to geology to determine if they warrant additional work.

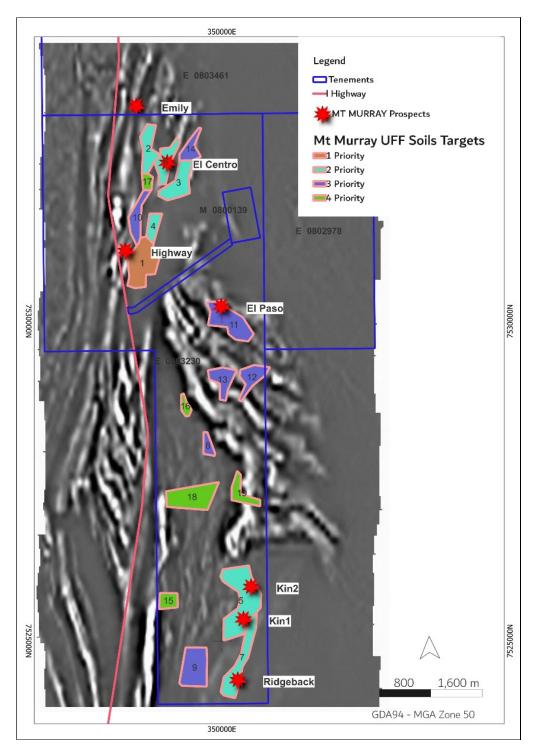

Figure 5: Mt Murray Project UFF Geochemical Targets

# High Priority Targets Next Step

Following completion of the upcoming MLEM program, the company hopes to identify prospective drill targets.

## Watsons Well Vanadium - Titanium-Iron Project (SFM 100%)

A total of 10 Reverse Circulation holes were drilled for 1,492m in September-October 2022 to test the central area of the 7km long Watsons Well high magnetic zone targeting high grade V2O5, TiO2 and Fe in rock chip samples results from outcropping massive magnetite layers, (*SFM Exploration Update 5<sup>th</sup> April 2022*). Two sections of drill-holes were completed 400m apart with all holes angled at -60 degrees to the east, perpendicular to the strike of the host magnetite rich gabbro. Drill-holes were spaced at a nominal 80m and completed to set depths of 149m or 150m. One hole, WWRC005, was completed 400m further east to test an outcropping parallel magnetite zone. Samples were collected for every 1m of drilling with 853 samples submitted for analytical work based on visual logging and magnetic susceptibility. Drilling conditions were good with hard fresh rock from near surface and only shallow (maximum 20m) weathering.

All ten drillholes intersected broad zones of strong magnetite with associated robust vanadium, titanium, and iron grades (Table 1). Multiple zones of mineralisation were intersected, ranging from 1m to 82m downhole width. The thickest zone, 84m, (0.2% V2O5 cut off) is in WWRC006 extending from 62m to 146m downhole grading 0.4% V2O5, 4.24% TiO2, 20% Fe (Figures 6-8). These results were reported to ASX on 3 April 2023.

Hole ID	From	То	Interval	Fe	TiO2	V2O5
	(m)	(m)	(m)	%	%	%
WWRC001	93	104	12	25.11	3.62	0.41
WWRC001	144	148	4	17.99	3.31	0.37

WWRC010	54	60	6	16.98	3.78	0.37

 Table 1: RC drillhole Vanadium-Titanium-Iron intersections calculated with a 0.3% V2O5 cut-off grade, a minimum 3m width and 1m internal low grade.

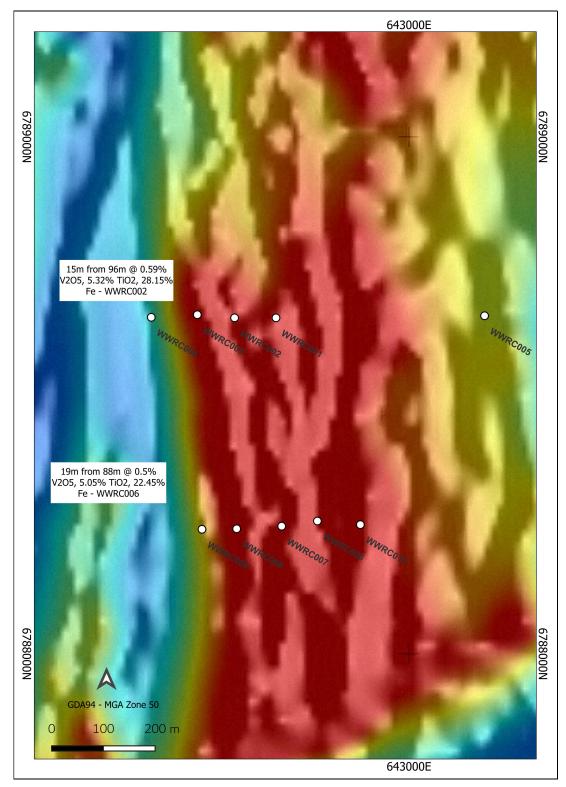

Figure 6 – Watsons Well airborne magnetics showing the middle of the 7km long magnetic anomaly, and the location of the completed RC drill hole collars highlighted with thick mineralised zones.

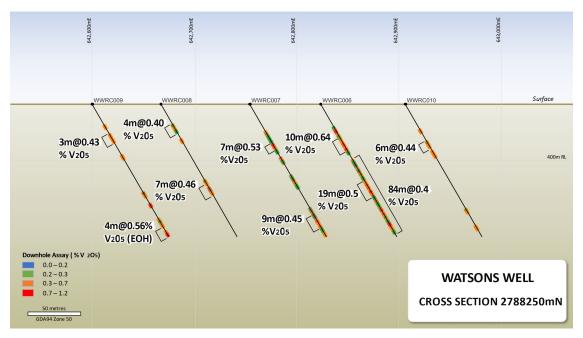

Figure 7: Watsons Well Southern RC drill section with highlighted V2O5 intersections.

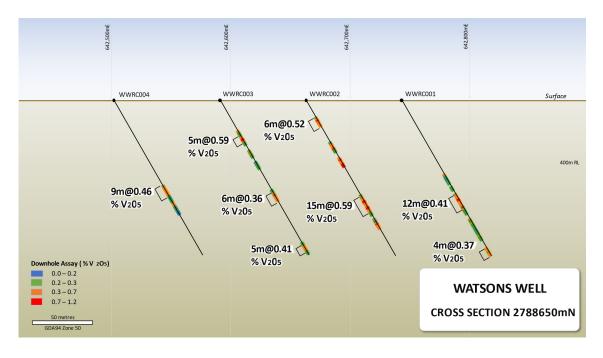

Figure 8: Watsons Well Northern RC drill section with highlighted V2O5 intersections.

## **Drilling Result Next Steps**

The maiden RC drilling program at Watsons Well successfully located thick zones with robust grades of vanadium – titanium mineralisation associated with strong magnetite (iron) content over 400m strike within the central part of the 7km long Watsons Well magnetic anomaly. One

hole was drilled 400m further east than the rest of the drilling (Figure 6) to test a small outcrop of massive magnetite. This hole, WWRC005, intersected two zones of mineralisation, 6m @ 0.62% V2O5, 5.35% TiO2, 26.73% Fe and 3m @ 0.49 V2O5, 4.15% TiO2, 25.02% Fe indicating the mineralised magnetite rich gabbro may be up to 600m wide whereas the current drilling has tested only 300m width.

Previously reported high-grade outcrops of massive magnetite over about 5kms strike (*SFM Exploration Update 5<sup>th</sup> April 2022*) suggests similar style vanadium titanium iron mineralisation is likely to be discovered over the entire length of the 7km long magnetic anomaly.

This is a large target and SFM will consider a range of exploration and drilling strategies to advance towards defining a resource. In parallel, the Company will also begin investigation of metallurgical and beneficiation options.

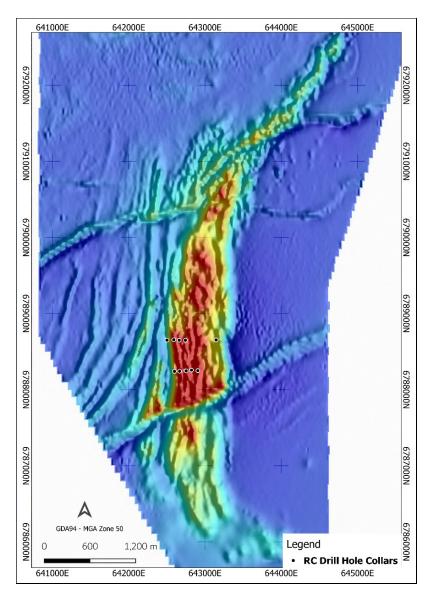

Figure 9: Watsons Well 7km long magnetic complex with SFM RC drill-hole collars.

## Challa North – Gold Project (SFM 100%)

During the quarter, work was limited to desk top studies.

### Corporate

At the end of the Quarter, the Company held a balance of \$2,543,417 in liquid assets comprising of \$2,524,123 in cash and shares held in listed entities with a market value of \$19,294.

During the quarter, the company sold the remaining 1,000,000 shares in Atlantic Lithium Ltd, receiving gross proceeds of \$587,255. Current shareholdings are as follows:

Oakajee Limited (ASX: OKJ)	1,286,250 fully paid ordinary shares

The Company continues to assess a number of opportunities in the resources sector.

This ASX announcement has been authorised for release by the Board.

#### **COMPLIANCE STATEMENT**

The information in this report that relates to Exploration Results is based on information compiled by Mr. Reginald Beaton who is a Member of the Australian Institute of Geoscientists. Mr. Beaton is an employee of Santa Fe Minerals Limited and has sufficient experience which is relevant to the style of mineralisation under consideration to qualify as a Competent Person as defined in the 2012 Edition of the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Beaton consents to the inclusion in the report of the matters based on the information compiled by him, in the form and context in which it appears.

The Company is not aware of any new information or data that materially affects the information included in the above.

## Appendix 1: Disclosures in accordance with ASX Listing Rule 5.3

Tenement	Holder <sup>1</sup>	Interest	Location	Status
E58/485	Challa Resources Pty Ltd	100%	Western Australia	Granted
E58/500	Challa Resources Pty Ltd	100%	Western Australia	Granted
E58/501	Challa Resources Pty Ltd	100%	Western Australia	Granted
E58/502	Challa Resources Pty Ltd	100%	Western Australia	Granted
E58/503	Challa Resources Pty Ltd	100%	Western Australia	Granted
E58/511	Challa Resources Pty Ltd	100%	Western Australia	Granted
E59/2257	Challa Minerals Pty Ltd	100%	Western Australia	Granted
E08/3461	Challa Resources Pty Ltd	100%	Western Australia	*Granted

## Tenements held at the end of the quarter

<sup>1</sup>Challa Resources Pty Ltd and Challa Minerals Pty Ltd are wholly owned subsidiaries of Santa Fe Minerals Limited.

The Company did not acquire or dispose of any mining tenements nor did it enter into any other farm-in or farm-out agreements during the quarter.

\*Application E08/3461 was granted on 21 April, 2023. The Company entered into a Heritage Agreement with Buurabalayji Thalanyji Aboriginal Corporation for this license, prior to its successful grant.

## Acquisition of Mt Murray

On 19 November 2021, the Company announced that it has, via its wholly owned subsidiary Challa Resources Pty Ltd (ACN 619 903 196) (Challa), entered into a binding option agreement to acquire, subject to certain conditions precedent, 80% of the legal and beneficial interest in any or both of the Western Australian exploration tenements E 08/2978 and E 08/3230 and 80% of the metals rights on M 08/139 from North West Stone Pty Ltd (ACN 159 838 712) (NWS) (Option). The key terms of the agreement are detailed below.

## Key Terms

The consideration for the grant of the Option was A\$50,000. The initial period of the Option will expire on 19 November 2023 (Initial Period) and will automatically be extended by three six month terms unless Challa provides written notice otherwise (Option Period). Challa must pay A\$30,000 for each additional term.

As a condition to the exercise of the Option, Challa must:

- (a) incur at least A\$200,000 of exploration expenditure on the tenements in the Initial Period; and
- (b) incur at least A\$300,000 of exploration expenditure on the tenements (in addition to the amount detailed in paragraph (a) above) in the Option Period.

If the condition is satisfied and the Option is exercised, the Company must issue to NWS the greater of:

- (a) 5,000,000 fully paid ordinary shares in Santa Fe; or
- (b) fully paid ordinary shares in Santa Fe to a value of A\$1,000,000 based on a 5 day VWAP share price prior to the date of exercise of the Option.

If the condition is satisfied, Challa may also elect to enter into a split commodity agreement with NWS for 80% of all metal rights in M 08/139 (Split Commodity Agreement). Upon election to enter into the Split Commodity Agreement, the Company must issue to NWS the greater of:

- (a) 500,000 fully paid ordinary shares in Santa Fe; or
- (b) fully paid ordinary shares in Santa Fe to a value of A\$100,000 based on a 5 day VWAP share price prior to the date of electing to enter into the Split Commodity Agreement.

Under the agreement, the total consideration shares that SFM will issue to exercise the option in its entirety is capped at 10,000,000. The Company intends to issue the above shares using its available placement capacity under listing rule 7.1.

If the Option is exercised, the parties shall commence good faith negotiations with a view to executing a joint venture agreement for the development of the tenements Challa has an interest in, with Challa as manager and operator of the joint venture. NWS will be free carried until a decision to mine.

The option agreement is otherwise on customary terms and conditions for a transaction of this nature, including pre-completion obligations, termination rights and warranties provided by the parties.

Santa Fe agreed to pay approximately \$2,600 of rates outstanding in respect of the exploration tenements.

The Company did not acquire or dispose of any mining tenements nor did it enter into any other farm-in or farm-out agreements during the quarter.

## **Related Party Payments**

During the quarter ended 30 June 2023, the Company made payments of \$60,775 to related parties and their associates. These payments relate to existing remuneration arrangements being director fees and superannuation.

8.4	Cash and cash equivalents at quarter end (item 4.6) 2,524		
8.5	Unused finance facilities available at quarter end (item 7.5) -		
8.6	Total available funding (item 8.4 + item 8.5)	2,524	
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	24.5	
	Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:		
	8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?		
	Answer: Not applicable.		
	<ul> <li>8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?</li> </ul>		
	Answer: Not applicable.		

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Not applicable.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

# **Compliance statement**

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 28 July 2023

Authorised by: By the Board of Santa Fe Minerals Limited (Name of body or officer authorising release – see note 4)

#### Notes

- 1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
