**QUARTERLY ACTIVITIES REPORT**  
**FOR THE PERIOD ENDED 31 MARCH 2025**

During the quarter, Santa Fe Minerals Ltd (“**Santa Fe**”, “**SFM**” or “**the Company**”) continued work on the Watson’s Well Vanadium project and the Challa Gold project.

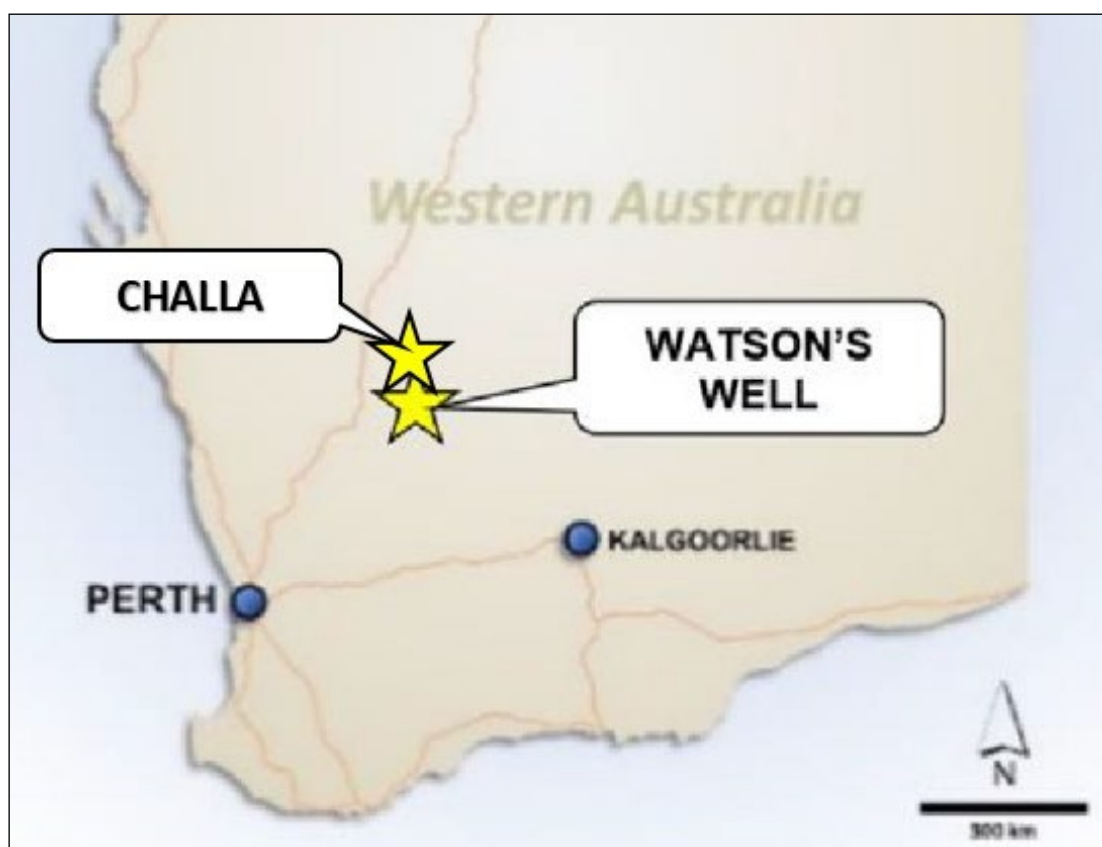

Figure 1: Project locations.

## **Challa North – Gold Project (SFM 100%)**

### **Golden Girls Prospect**

The Golden Girls area has been subject to extensive metal detecting for gold nuggets, and several phases of surface sampling with some limited drill testing. Several drill intersections of anomalous gold (>100ppb Au) were identified with a maximum result of 3.74g/t Au (ASX Announcement 6<sup>th</sup> August 2018). No further drilling has been completed. Grid based Auger geochemical sampling successfully extended the known gold anomalies and identified additional anomalies over a 5km strike with maximum results of 256ppb and 245ppb Au. Three of these new anomalies are either at the end of sample lines or are open along strike. (ASX Announcement 12<sup>th</sup> January 2022).

The additional Auger sampling planned for the March Quarter is now set to begin early May. This work is to further define and extend these gold anomalies. Once results are received, an expanded AC drilling program will be planned to test both the currently defined targets and any new targets defined.

## **Watsons Well Vanadium – Titanium-Iron Project (SFM 100%)**

### **Background**

The Watsons Well area hosts a 7km long high magnetic zone containing extensive vanadium-titanium-iron mineralisation. The vanadium-titanium and iron mineralisation occur in massive to disseminated magnetite layers within the host gabbro and is easily traceable in magnetic survey data (Figures 3-4). A maiden drilling program targeting the central thicker part of the 7km magnetic high zone intersected strong magnetite with associated robust vanadium-titanium and iron grades (ASX Announcement 3<sup>rd</sup> April 2023). Multiple thick zones were intersected ranging up to 84m downhole. This thick zone in WWRC006 extended from 62m to 146m grading 0.4% V<sub>2</sub>O<sub>5</sub>, 4.24% TiO<sub>2</sub>, 20% Fe (Table 1). The drill section in Figure 3 shows the strong correlation of magnetite with V<sub>2</sub>O<sub>5</sub> grades.

### **Drone Magnetic Survey**

An ultra-detailed drone based magnetic survey was completed during the September 2024 Quarter to better define the magnetite layers, host to the vanadium titanium iron mineralisation at Watsons Well. Processed data was received and analysed during the December 2024 Quarter (ASX 31<sup>st</sup> October 2024). The new magnetic data was collected from 28m height along 25m spaced flight lines over the central 4km by 2km area of the 7km long target zone which includes the area of the RC drilling (ASX 3<sup>rd</sup> April 2023). The images in Figure 4 clearly show the superior definition of the ultra-detailed magnetics in comparison to the previous 50m line spaced data. The position of the magnetite zones defined by a high magnetic response and the width of the target zone are clearly identified. Fault offsets of magnetite layers are also clearly defined. The overall width of magnetic rich gabbro in the vicinity of the RC drilling is about 800m with multiple potentially vanadium-titanium layers visible in the drone magnetics whereas RC drilling has only tested about half of the potential width.

The ultra detailed magnetic data will be highly valuable for targeting vanadium titanium iron layers with additional RC drilling.

## Corporate

At the end of the Quarter, the Company held a balance of \$1,284,804 in liquid assets comprising of \$1,268,083 in cash and shares held in listed entities with a market value of \$16,721. Current shareholdings are as follows:

Oakajee Limited (ASX: OKJ)	1,286,250 fully paid ordinary shares
----------------------------	--------------------------------------

The Company continues to assess a number of opportunities in the resources sector, with a particular focus on gold exploration.

This ASX announcement has been authorised for release by the Board.

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
