Company Announcements Office  
ASX Limited

### **GROUND EM SURVEY COMMENCES AT YARRAMBIE NICKEL PROSPECT**

Santa Fe Minerals Ltd (ASX: **SFM**) (SFM, the **Company**) is pleased to announce the commencement of a ground based moving-loop time-domain electromagnetics (MLTEM) survey over its Yarrambie Nickel prospect in Western Australia.

Yarrambie is defined by a discrete magnetic feature associated with anomalous nickel, copper and cobalt in soil lag sampling. The survey will cover the 2.5km long anomaly and will feature a total of 27 lines on a 200m line and 100m station spacing. Refer to Figure 1 below.

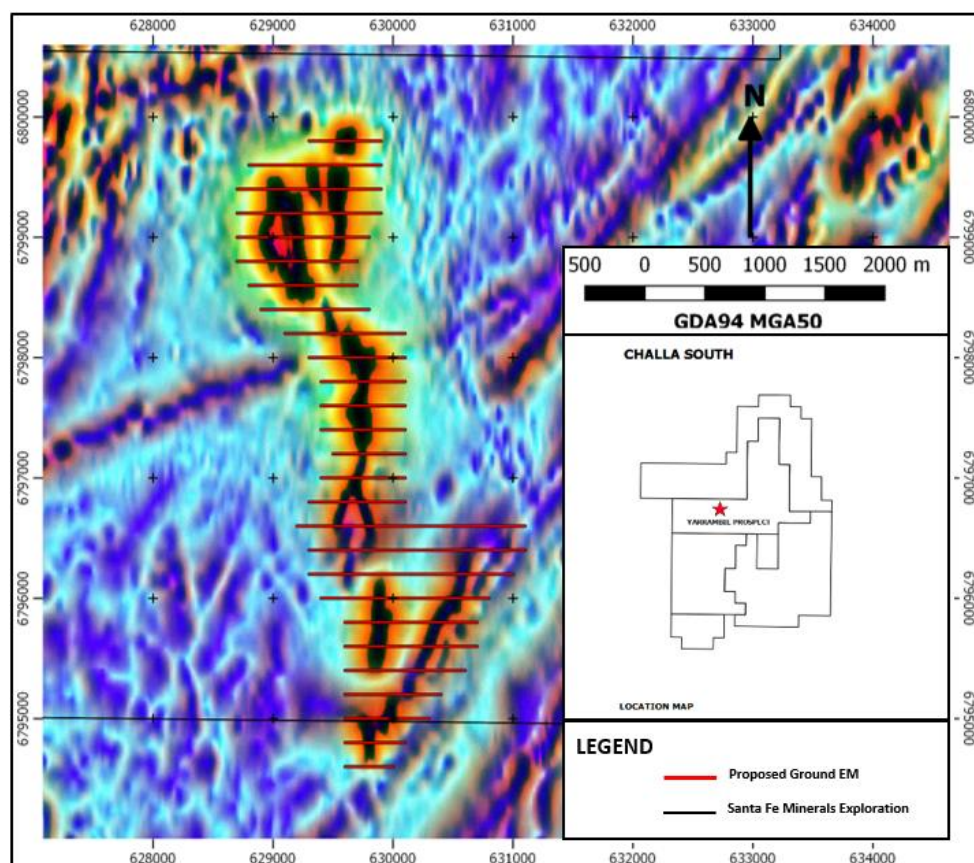

Figure 1: Yarrambie prospect showing proposed MLTEM survey lines.

It is estimated that the survey will take approximately 10 days to complete. Conductors identified from the survey should be followed up with fixed-loop EM to better define their extent to target with drilling.

The Company will update the market in the near term.
